# Empower Your Students to Earn a U.S. Dual Diploma

**Fusion Global Academy's 100% live, synchronous virtual courses give students the option to earn a U.S. diploma from their home country.**

Fusion Global Academy is the online school that changes everything. Our personalized approach and supportive environment make us an excellent partner for your students to earn a dual diploma.

## **Personalized Learning:**

Courses are taught **live** with experienced teachers based in the United States, which is a superior and more effective learning experience than other self-guided online programs. Courses are available in small groups (no more than 5 students) and 1-to-1 (just one student and one teacher).

## **Cultural Experience:**

Outside of class, students interact with peers worldwide in our Global Homework Café. In this space we offer homework support and many opportunities for socialization with students around the world.

## **Higher Education Edge:**

This is a more affordable option for your students who hope to attend a college or university in the United States. Students don't have to plan for living expenses, but still get the advantage of a higher chance of acceptance at a U.S. higher education institution.

## **Partnership Benefits**

As a partner school, your administrative requirements are minimal - we will handle everything beyond collecting student tuition and assigning courses.

## **Quick Facts**

- 300+ core and elective courses available including AP® options
- NCAA and UC-approved courses
- 99% of Fusion students who applied to a 4-year college were accepted
- 87% of accepted Fusion students will be attending their first-choice college
- 80+ campus locations across the U.S. for a study abroad opportunity

## **Dual Diploma Requirements**

Students must earn a total of 230 credits during their high school years to meet Fusion graduation requirements. Once the Fusion Education team ensures that credits earned at home school are equivalent to U.S. requirements, students then can take at least 7 courses with us to receive a Fusion diploma.
